

VEHICLE PROTECTION BRILLIANCE AT ITS BEST. UNMATCHED.

# PERFORMANCE YOU HAVE TO SEE

Protektiv HYDRO surface coating is made from a high performing formula combining Silicon Carbide (SiC) and Ceramic, delivering extreme durability, hardness and a permanent super gloss finish.

⊕ **MIRROR-FINISH  
 SUPER GLOSS**

A Silicon Carbide (SiC) base creates extreme gloss and shine, and the super hydrophobic properties help repel dirt, dust & roadgrime.

⊕ **DURABILITY TESTED  
 TO LAST A LIFETIME\***

As the most durable protective product on the market, Protektiv HYDRO is 4 times harder than quartz based protectors.

⊕ **PROVEN & GLOBALLY  
 CERTIFIED**

Tested, proven and globally certified to the stringent standards set out for Boeing compatible products.

⊕ Vehicle surfaces are transformed into a super-hydrophobic coating providing a highly repellent vehicle finish.

## THERE'S NOTHING ELSE LIKE IT

\* Warranty terms, conditions & exclusions apply.

# TESTED, TESTED & TESTED AGAIN

## EXTRA THICKNESS, ENHANCED PROTECTION

Protektiv HYDRO adds an extra, tougher layer on top of the vehicles factory clear coat.

## HARDER, BETTER, FASTER & STRONGER THAN EVER BEFORE

### + CERAMIC TECHNOLOGY AT ITS BEST

Protektiv HYDRO surface coating engineered with Silicon Carbide and Ceramic. This, when combined with Silicon Dioxide delivers a coating with outstanding hardness, heat tolerance and gloss. Once applied, the cage-like structure of the coating creates a linkage process that fuses to the clearcoat, whilst the molecules of the silica core framework provide a rigid toughness and high thermal stability.

### + RIGOROUS DURABILITY TESTING

The Protektiv HYDRO formula reactive engineered curing process creates a super durable ceramic coating delivering extreme hardness and super hydrophobic properties helping to repel dirt, dust & roadgrime. To measure the strength of Protektiv HYDRO'S level of durability, we've applied the globally accepted Mohs Hardness Scale, which compares the resistance of a mineral being scratched by ten reference minerals. **Protektiv HYDRO ranks 9 out of 10 which rates it 4 times harder than quartz-based surface protection products readily available in today's market.** This enables us to provide a lifetime warranty\* against the environmental elements; so you can experience a lifetime of performance.

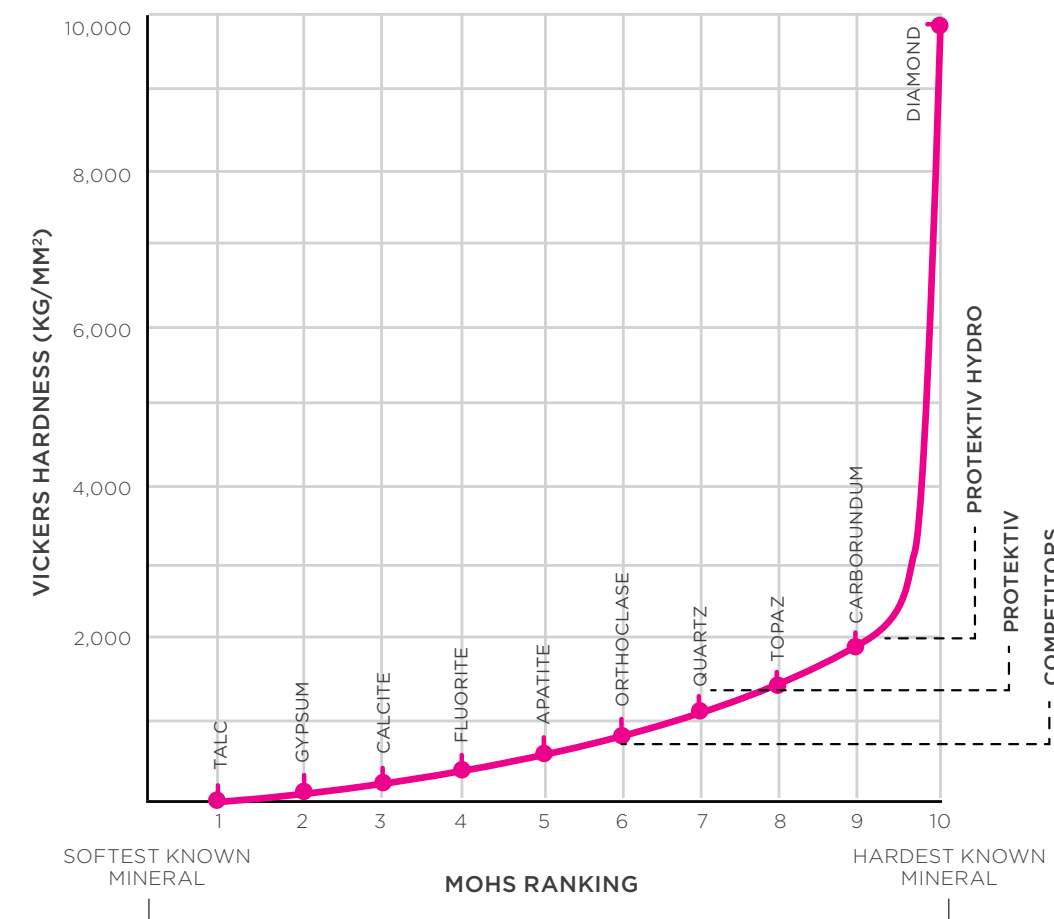

### + GLOBALLY TESTED, PROVEN & CERTIFIED

The engineered combination of globally high grade sourced raw materials that are leading the way in worldwide coating technology has passed and been certified to the stringent BOEING D6-17487 specification. The amazing product standards of Protektiv HYDRO allow the surfaces of your new vehicle to continue to shine year after year and be protected by a nationally supported lifetime warranty\*.

Protektiv HYDRO has been certified to meet Boeing D6-17487 specification after rigorous testing against stringent standards set out for Boeing compatible products.

\* Warranty terms, conditions & exclusions apply.

### MOHS SCALE OF HARDNESS COMPARISON

Mohs vs. Vickers hardness comparison: This chart compares the hardness of index minerals of the Mohs hardness scale (an integer scale) with their Vickers hardness (a continuous scale). Mohs hardness is a resistance to being scratched, while Vickers hardness is a resistance to indentation under pressure. The graph shows the great difference between the Vickers hardness of Carborundum and diamond - which are only one unit apart on the Mohs hardness scale.

**INTERIOR  
PROTECTION  
AHEAD OF  
THE GAME**

## DON'T WORRY ABOUT MAKING A MESS

### LATEST SPECIFICATION TECHNOLOGY

Engineering of the interior copolymer coating allows Protektiv HYDRO interior protection to bond with the latest technology currently used in vehicle manufacturer's surface textiles including vinyl, leather carpet & fabrics & even Alcantara. HYDRO cross-linked polymer formula delivers repellence and protection like no other interior coating.

### ADVANCED DURABILITY

The Copolymer linkage properties of the Protektiv HYDRO interior treatment along with a unique flash-off curing process creates a super durable coating with repellent properties. Once applied to the interior surfaces the coating begins to perform a reactive engineered curing process that's amazingly durable.

### PROTEKTIV HYDRO PENETRATES AND BONDS TO INDIVIDUAL FIBRES

Protektiv HYDRO interior protection prevents permanent staining of the treated surfaces from common food & drink spills including water, coffee, milk & soda as well as makeup and sunscreen.

Protection for the whole interior all backed by a national lifetime warranty\*.

### BOTTOM LINE, SUPER REPELLENT TO LIQUIDS, SPILLS AND STAINS
